Gurumurthy

Role: Java Developer| **Mob:** +91 9535739160 | **Email:** gurumurthy.murthy@capgemini.com

Synopsis

 Backend developer with 7.5 years' experience across Consumer, Finance and Health domain. Have worked on Java J2EE, Spring Boot, HTML, JavaScript, Micro services, private cloud and REST web services and well exposure to Angular and React . Looking for opportunity to work in niche features of Micro services and front end technology.

Experience Summary

- ❖ 2.5 years of experience in Oracle PL/SQL.
- ❖ 5 years of experience in Java8, Spring framework including spring boot, spring data.
- ❖ Hands on experience in publishing and consuming REST APIs
- ❖ Extensive experience in the Banking Operations domain and Agile methodology.
- ❖ Experience in CI/CD of web application hosted on private cloud environment and AWS.
- ❖ Strong Client facing and requirement gathering skills.

Technical Skill Set:

Language	Core Java, HTML, CSS, JavaScript, TypeScript, React
Framework	OSA, Quartz, Struts, Spring Boot
Tool	Service Now, Putty, WinSCP, Dynatrace, Checkmarx
Services	RESTful Webservices
Web / Application Server	Apache Tomcat Server
Database	MS SQL, Sybase SQL, Oracle PL/SQL, Postgres, Hibernate
Web / Application Server	Apache Tomcat Server
Version Management tool	SVN, GIT
IDE	IntelliJ
Utilities	Jenkins, Docker
Development Methodologies	Agile (Scrum)

PROJECT 4: E-SIGNING APPLICATION

Microservice application built on Spring Boot framework to achieve e-signing of contracts.
Technology: Java8, Spring Boot, React, Hibernate, JPA, Postgres, AWS
Role:
  - Working as a lead developer of the application

PROJECT 3: BANKING CREDIT APPLICATION

Banking microservice application built on Spring Boot framework to do collateral evaluation of stocks, shares and bonds for pledging.

Technology: Java8, Spring Boot, Angular, Hibernate, JPA, MS SQL database, Docker, Kubernetes

Role:

  - Strong development experience on core Java, Maven, Spring Boot, Spring Data
  - Experience with building both consuming and publishing RESTful APIs
  - Experience on CI/CD build and deployment tools

PROJECT 2: FUNDS PERFORMANCE CALCULATOR

Banking web application hosted on private Cloud used for fund performance calculation including portfolio management, security mappings, and report generation

Technology: Java, Struts, HTML, JavaScript, Sybase database and JDBC
Role:
  - Development of batches in Java on Struts framework
  - Developing user interface using HTML, CSS and validation through JavaScript
  - Writing optimized stored procedures for high scope, complex business calculation logic called through JDBC connection.
  - Development of loaders to load, delete and modify bulk data through screen and creation of tables, indexing and setting up archival process.

PROJECT 1: RETAIL INVENTORY AND BILLING APPLICATION

DMS web application used by countries leading car manufacturer business unit and dealers for inventory management, administration, billing sales and service of vehicles.

Technology: Oracle PL SQL

Role:
  - As a DBA developer participated in data design,requirement gathering and perform PLSQL development by creating stored procedures, functions and packages.
  - Creation of Views, Partition, bulk insertion of data
  - Tuning of queries for performance analysis and code optimization
